DETAILED ACTION

Response to Arguments

1. In view of the appeal brief filed on 06/11/03, PROSECUTION IS HEREBY REOPENED. A new action on the merits as set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-7 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Pascucci (US 5,901,087; previously cited).

With regard to claim 1, Pascucci discloses in Fig.2 a comparator circuit comprising an evaluation element (2); and at least first and second input legs each coupled to a corresponding one of a first (B) and second (B') node of the evaluation element, the first and second input legs having non-complementary structures relative to one another and being adapted to receive

Art Unit: 2816

respective first and second input signals (YM<0-15>, YN<0-15>), each of the non-complementary structures having associated therewith a variable parameter having a value (Il, Ir) that is a function of a corresponding one of the input signals, the evaluation element being adapted to perform a comparison of the first and second input signals (see column 4).

With regard to claims 2-7, Pascucci also meets these claimed limitations.

Claim 36 is similarly rejected, note the above discussion with regard to claim 1.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 37 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pascucci.

The above discussed the circuit of Pascucci meets all of the claimed limitations except for the limitation that the comparator circuit is fabricated in the integrated circuit. However, it would have been obvious to one of ordinary skill in the art to implement the comparator circuit of Pascucci in a single Integrated Circuit for the advantage of being able to reduce the area of the circuit.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai L. Nguyen whose telephone number is 703-306-9178 and
